

# CyBlock Appliance

## Reliable Internet Filtering Hardware for Your Organization

CyBlock Appliance is powerful filtering hardware that blocks Web sites, IM, P2P, streaming, file sharing and more. In addition to providing the best Internet filtering coverage for your organization, it includes robust monitoring, logging and reporting capabilities. Get precision filtering with the industry's best user-activity reporting in one high-performance solution.

### Key Features

- **Multi-Protocol Filtering.** Filter IM, P2P, Torrents, Email, Web, etc.
- **Web Filtering.** Block social networks, video/music streaming, downloads, etc.
- **Comprehensive Coverage.** Filter over 500 million Web pages in 74 categories.
- **Productivity Protection.** Block and monitor social networks, shopping, games and more.
- **Real-Time Monitoring.** Get live views of employees' Web activity and bandwidth usage.
- **Employee-Focused Reporting.** Get accurate, actionable Web-use reports.

### Filtering

- **White List Filtering.** Create 'allowable' lists for users and groups.
- **Scheduled Blocking.** Allow employees to access blocked categories during lunch or breaks.
- **Personalized Block Policies.** Design block policies to match your AUP.
- **Custom Categories.** Add unique categories to block specific sites.
- **Customizable Block Message.** Link to your own blocking message or AUP.

### Reporting

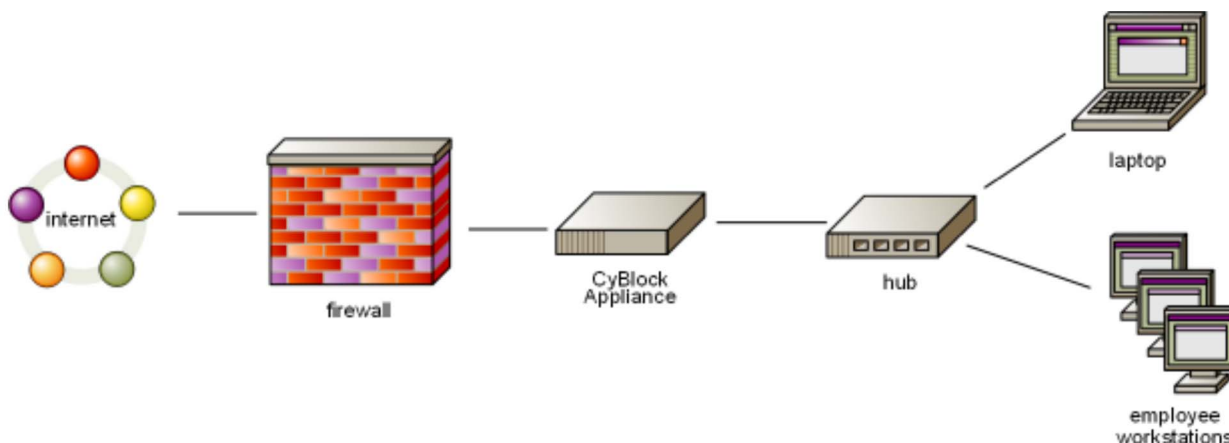

- **Dashboard.** See an overall picture of the organization's Web activity.
- **Top Charts.** Get a quick view of the top users, groups, categories, and sites.
- **Trend Charts.** Easily spot spikes in bandwidth and employee Web use.
- **Automatic Abuse Detection.** Identify Internet abuse immediately in Web reports.
- **Interactive Reporting.** Drill down to more detailed data in reports.
- **Report Scheduler and Distribution.** Run and distribute reports automatically.
- **Operator Accounts.** Provide reporting-only access to managers and HR.
- **VIP Exclusion and Anonymous IDs.** Exclude or hide login names from reports.

### Technical Features

- **Transparent Device.** Get seamless integration with your network configuration.
- **Security Assurance.** Protect against spyware, malware, public proxies and more.
- **Bandwidth Protection.** Block Web sites that consume the most bandwidth.
- **Minimal-Effort Administration.** Turnkey solution ensures minimal administration.
- **Active Directory Support.** Integrate seamlessly with Active Directory.
- **Daily URL List Updates.** Stay on top of the latest Web 2.0 trends with automatic updates.
- **Superior Tech Support.** Access our knowledgeable support staff and services.

## Network Configuration

The appliance works as an in-line device between your internal network and the Internet. It acts like a bridge allowing Internet traffic to flow transparently through the appliance, giving it the ability to block and monitor Web sites and applications, i.e., IM, P2P, Email, etc. by users and groups.

## Compatibility

**Operating Systems Compatible with CyBlock Client:** Windows Server 2000/2003/2008, Windows 2000 Professional, XP and Vista

**CyBlock Appliance Browser Interface Compatibility:** Microsoft Internet Explorer 7.0 or higher and Mozilla Firefox

## Appliance Rack Hardware Specs

**Form Factor** 1U Rack  
**Height:** 1.7" (43mm)  
**Width:** 16.8" (426mm)  
**Depth:** 14.0" (356mm)  
**Weight:** 12.8 lbs. (5.8kg)  
**Power Supply:** 200W High-efficiency  
**Integrated:** 10/100/1000 Ethernet LAN

## Appliance Tower Hardware Specs

**Height:** 14.69" (373mm)  
**Width:** 4.17" (106mm)  
**Depth:** 17.2" (437mm)  
**Weight:** 12.79lbs (5.8kg)  
**Power Supply:** 250W, 115/230VAC  
**Integrated:** 10/100/1000 Ethernet LAN

## About Wavecrest

Wavecrest Computing has provided business and government clients with reliable, accurate Web use management products since 1996. IT specialists, HR professionals and business managers trust Wavecrest's Cyfin® and CyBlock® products to manage employee Internet usage - reducing liability risks, improving productivity, saving bandwidth and controlling costs.

Wavecrest has over 3,000 clients worldwide, including Procter & Gamble, General Electric, British Telecom, Miller Coors, Edward Jones, IKEA, Siemens, the US Army and a growing list of global enterprises and government agencies. Wavecrest Computing is a GSA Schedule Contractor. For more information on our company, products and partners, visit [www.wavecrest.net](http://www.wavecrest.net).
