

Easy Plug-In Solution for ISA Server or TMG

CyBlock ISA/TMG is a precision Web filter that can block or allow access to any Web site by employee, department, or enterprise. Designed specifically to support Microsoft ISA Server or Forefront TMG, it also provides IT, HR, and management with a variety of actionable employee Web-use reports. All reports can easily be configured to show as much or as little data as desired, and several can automatically flag Web abuse in accordance with your own usage policy.

Web Access Control

- Enforce your Acceptable Use Policy (or policies) automatically.
- Configure policy exceptions for different users and groups.
- Curtail casual surfing in the workplace.
- Filter by 70+ standard and unlimited custom categories.
- Implement flexible, scheduled filtering by day, hour, or half hour.
- Use white & black lists to control Web use – by users and groups.
- Create your own blocking notification message.

Malware Protection

- Keep out viruses, Trojan horses, spyware, phishing attacks, and more.
- Identify and stay ahead of a growing number of malware sites.
- Prevent crashes, slowdowns, and information theft.

Comprehensive, Manager-Ready Reports

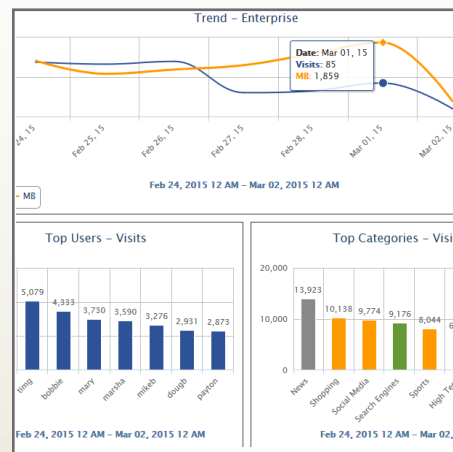

- Use CyBlock Dashboard for quick, high-level assessments.
- Use several preconfigured but customizable report templates.
- Get a variety of high-level summaries and detailed audits.
- Let managers get reports without IT involvement.
- Schedule reports for automatic distribution.

Array Configuration Support

- Manage multi-location installations from one primary server.
- Can be used in a single- or multi-facility environment.
- Primary server pushes policies and settings out to secondary servers.
- Filtering is performed by the secondary servers.
- Array approach spreads data processing workload over multiple servers to prevent overloads.
- Enables centralized Web-use management and reporting.
- Secondary servers read, parse, and categorize their Web log data.
- Primary server creates and distributes reports.

Installation and Evaluation Support

When needed, Wavecrest provides consultation and advice via telephone or e-mail at no charge during the free trial period.

Pricing

CyBlock is a licensed, subscription-based software product. Pricing is tiered, based on the number of personnel ("nonconcurrent users") to be monitored. In general, the price-per-user decreases as the number of users goes up. Every CyBlock purchase includes:

- U.S.-based technical support programs available
- Daily URL List updates
- Free product upgrades
- 90-day money back guarantee

Discount pricing is available for government agencies, educational institutions, nonprofit organizations, and resellers. For more information, contact Sales at 321-953-5351, Ext. 3.

Since 1996, Wavecrest Computing has provided business and government clients with reliable, accurate employee Web-access security, monitoring, and analytics solutions. IT specialists, HR professionals, and business managers trust Wavecrest's Cyfin and CyBlock products to manage employee Internet usage with today's distributed workforce in mind—monitoring VPN use, following roaming and remote users, managing and monitoring Web usage for hybrid work environments, comprehensive reporting on Microsoft 365 use, and more. Focused on our customer's needs—reducing liability risks, improving productivity, managing cloud services, saving bandwidth, and controlling costs.

Wavecrest has clients worldwide, including Canadian National Railway, Johns Hopkins, Goodyear, USPS Office of Inspector General, Chevron, Health Choice Network, and a growing list of enterprises and government agencies. For more information on our company, products, and partners, visit www.wavecrest.net.
