

Advanced Employee Web-Use Analysis & Reporting

Cyfin provides advanced employee Web-use analysis and reporting for a wide variety of gateway devices and log file formats. Comprehensive yet easy to use, its customized reporting capabilities supply audience-specific Web-use information with reliable metrics, easy-to-read reporting dashboards, manager-ready detailed audit reports, and Smart Engine analytics.

Smart Engine Analytics

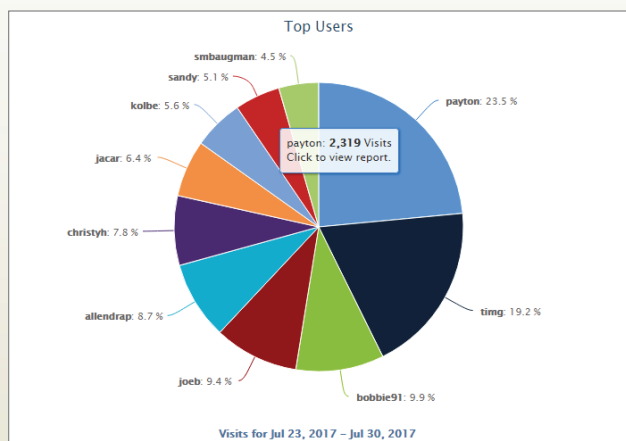

- Makes technical data easy to consume and manager-ready.
- Utilizes precise algorithms to present accurate and up-to-date Web-use data.
- Distinguishes between user clicks (visits) and unsolicited traffic (hits).
- Analyzes large volumes of data over long periods of time.
- Feeds pertinent data to the reporting dashboards.

Detailed User Audits

- Show activity by entire organization, groups, users, and categories.
- Get accurate, actionable, manager-ready detailed reports.
- See the exact search terms entered by users and their search time.
- Determine how much time a user spends online.
- View Web content most frequently visited by a user.
- Dramatically reduce analysis time of your organization's Web use.
- Comply with government and industry regulations such as CIPA and HIPAA.

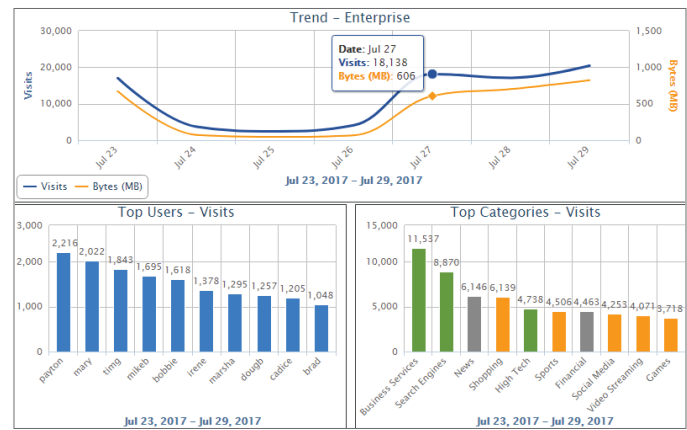

Hits vs. Visits

- Most accurate visit algorithm in the industry.
- Visits give uncluttered, relevant Web activity detail based on user clicks.
- Visits are a critical component to understanding human behavior.
- Hits consist of unsolicited traffic and are not a reliable tracking metric on their own.

Manager Access

- Schedule and distribute reports
 - Send easy-to-read reports directly to managers.
 - Easily distribute reports manually or schedule for automatic distribution.
 - Managers drill down to detailed user Web activity with interactive capability.
- Self-service portal
 - Reporting-only access portal for managers.
 - Managers create reports on authorized groups without assistance from IT.
 - Easy-to-read, manager-friendly, actionable reporting dashboard.

Technical Advantages

- **Built-In Syslog Server.** Directly connect syslog-enabled devices.
- **Bandwidth Protection.** Monitor Web sites that consume the most bandwidth.
- **Security Assurance.** Identify spyware, malware, public proxies, etc.
- **Active Directory Support.** Seamlessly integrate with Active Directory.
- **Automatic List Updates.** Stay on top of the latest Web 2.0 trends.
- **Minimal-Error Administration.** Administer through the browser with ease.
- **Array Support.** Manage multi-location configurations from one server.
- **Scalability.** Handle small to large amounts of data as your company grows.
- **Adaptability.** Support log file formats regardless of proxy server or firewall.

Log File Support

Cyfin supports Palo Alto, SonicWall, Check Point, WatchGuard, Cisco, Fortinet, and Sophos log file formats, and many more.

Minimum System Requirements

- **Processor:** 2 GHz
- **Memory:** 4 GB RAM
- **Hard Disk:** 500 MB free disk space depending on log file storage needs
- **Supported Operating Systems:** Windows Server 2016/2012/2008, Windows 10/8/7, Linux: Red Hat, Fedora, CentOS, and Ubuntu, Chrome OS 57
- **Supported VM Environments:** VMware and Hyper-V

Note: See [Cyfin System Requirements](#) for more details on the best platform for your environment.
