

Secure Employee Web Filtering and Monitoring Software Solution

CyBlock Employee Web Filtering and Monitoring Software provides advanced Web filtering, threat protection, comprehensive employee reporting, Smart Engine analytics, easy-to-use admin and manager portals, and more.

Advanced Web Filtering

- Configure policy exceptions for different users and groups.
- Use white & black lists to restrict or allow access to certain sites.
- Limit users' time online by hour and day of the week.
- Enable users to bypass a blocking action with coaching.
- Inspect or "tunnel" HTTPS by Web site, category, or user ID.
- Identify and stay ahead of a growing number of malware sites.

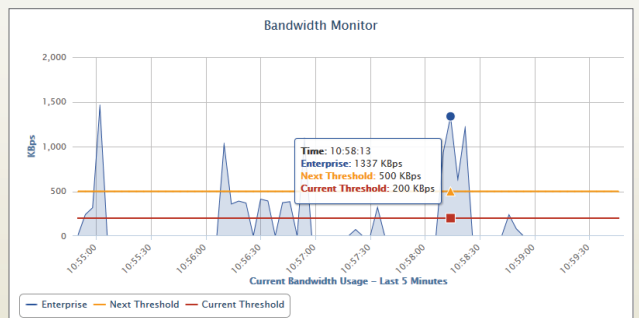

Comprehensive Employee Reporting

- Show activity by entire organization, groups, users, and categories.
- Get accurate, actionable, manager-ready detailed reports.
- View snapshots of Web activity with drill-down capability, identifying top Internet consumers.
- View trends and comparisons in Web activity.
- Easily distribute reports manually or schedule for automatic distribution.
- Dramatically reduce analysis time of your organization's Web use.
- Comply with government and industry regulations such as CIPA and HIPAA.

Bandwidth Management

- Trigger alerts and throttle bandwidth.
- Set byte usage threshold limits.
- Cap or block nonessential bandwidth.
- Identify bandwidth hogs in real time.
- Monitor current employee bandwidth consumption.
- Get alerts and e-mail notifications when bandwidth thresholds are exceeded.

Smart Engine Analytics

- Makes technical data easy to consume and manager-ready.
- Utilizes precise algorithms to present accurate and up-to-date Web-use data.
- Distinguishes between user clicks (visits) and unsolicited traffic (hits).
- Analyzes large volumes of data over long periods of time.
- Feeds pertinent data to the reporting dashboards.

Technical Advantages

- **Directory Support.** Synchronize CyBlock with AD or another directory.
- **Automatic List Updates.** Stay on top of the latest Web 2.0 trends.
- **Minimal-Effort Administration.** Administer through the browser with ease.
- **Array Configuration.** Manage multi-location configurations from one server.
- **VM Installations.** Deploy in VMware and Hyper-V environments.
- **Multi-Copy Support.** Deploy multiple installations under 1 license.
- **Hybrid Cloud Option.** Safeguard all employees in the organization.
- **Support.** Access our knowledgeable support staff and services for free.

Minimum System Requirements

- **Processor:** 2 GHz
- **Memory:** 4 GB RAM
- **Hard Disk:** 500 MB free disk space depending on log file storage needs
- **Supported Operating Systems:** Windows Server 2016/2012/2008, Linux: Red Hat, Fedora, CentOS, and Ubuntu, Chrome OS 57
- **Note:** Contact Wavecrest Technical Support for additional Linux support.
- **Supported VM Environments:** VMware and Hyper-V

Wavecrest has over 20 years of proven history of providing reliable, accurate Web-use management and Advanced Log File Analyzer products across various industries. Managed Service Providers, IT Specialists, HR professionals, Forensics Investigators, and business managers trust Wavecrest's Cyfin and CyBlock products to manage the human factor in business Internet usage—managing cloud services, reducing liability risks, improving productivity, saving bandwidth, and controlling costs. Wavecrest is trusted by large government and commercial organizations such as US-CERT Homeland Security, U.S. Department of Justice, USPS Office of Inspector General, National Grid, Johns Hopkins, and a growing list of global enterprises and government agencies. We are a proud long-term GSA contract holder. For more information on the company, products, and partners, visit <https://www.wavecrest.net>.
