

Secure Employee Web Filtering Gateway Appliances

CyBlock Employee Web Filtering Gateway appliances provide advanced Web filtering, threat protection, secure guest Wi-Fi with captive portal, and customized reporting capabilities, such as Operational, Strategic, and Analytical reporting, utilizing Smart Engine analytics.

Advanced Web Filtering

- Configure policy exceptions for different users and groups.
- Use white & black lists to restrict or allow access to certain sites.
- Limit users' time online by hour and day of the week.
- Identify potential guest Wi-Fi risks.
- Monitor unmanaged devices with captive portal.
- Gain advanced threat protection.
- Inspect or "tunnel" HTTPS by Web site, category, or user ID.
- Identify and stay ahead of a growing number of malware sites.

Comprehensive Employee Reporting

- Show activity by entire organization, groups, users, and categories.
- Get accurate, actionable, manager-ready detailed reports.
- View snapshots of Web activity with drill-down capability, identifying top Internet consumers.
- View trends and comparisons in Web activity.
- Easily distribute reports manually or schedule for automatic distribution.
- Dramatically reduce analysis time of your organization's Web use.
- Comply with government and industry regulations such as CIPA and HIPAA.

Smart Engine with Machine-Learning Analytics

- Makes technical data easy to consume and manager-ready.
- Analyzes large volumes of data over long periods of time.
- Provides rapid and superior data insights.
- Tags associate related domains with friendly names.

Audit Detail For ID "Technical Services Department/Banning. Payton (payton)"

Bandwidth Management

- Trigger alerts and throttle bandwidth.
- Set byte usage threshold limits.
- Cap or block nonessential bandwidth.
- Identify bandwidth hogs in real time.
- Monitor current employee bandwidth consumption.
- Get alerts and e-mail notifications when bandwidth thresholds are exceeded.

Technical Specifications

MODEL COMPARISON	 MINI APPLIANCE	 APPLIANCE
Form Factor	Tabletop/Wall Mount	1U Rack
Processor	Intel® 1.60 GHz	Intel® 2.90 GHz
Memory	4 GB	4 GB
Storage	16 GB SSD	250 GB SSD
Dimensions (in.)	6.8 x 1.6 x 5.1	16.8 x 1.7 x 14.0
Weight (lb.)	2.4	12.8
Network Interface	2 x 1 Gigabit	2 x 1 Gigabit
Ethernet Bypass Hardware	No	Yes
Concurrent Users	1-500	500-10,000
Fanless Design	Yes	No

Subscription Service

- No-charge, U.S.-based Wavecrest Technical Support by phone, live chat, WebEx, and e-mail for the lifetime of your license
- Continuous URL List updates
- Free product upgrades
- Hardware warranty with replacement unit shipped next business day
- 30-day money-back guarantee

Network Configuration

In an inline installation, the mini/appliance works as a device between your internal network and the Internet. Internet traffic flows through it transparently, giving it the ability to block and monitor Web sites and protocols, e.g., IM, P2P, and e-mail. In a proxy configuration, traffic is sent to the mini/appliance as proxy requests where HTTP and HTTPS requests, content type, and more are blocked and monitored.
