

# Advanced Employee Web-Use Analysis & Reporting

Cyfin Virtual Appliance provides advanced employee Web-use analysis and reporting for a wide variety of gateway devices and log file formats. Comprehensive yet easy to use, its customized reporting capabilities supply audience-specific Web-use information with reliable metrics, easy-to-read reporting dashboards, manager-ready detailed audit reports, and Smart Engine analytics.

## Smart Engine Analytics

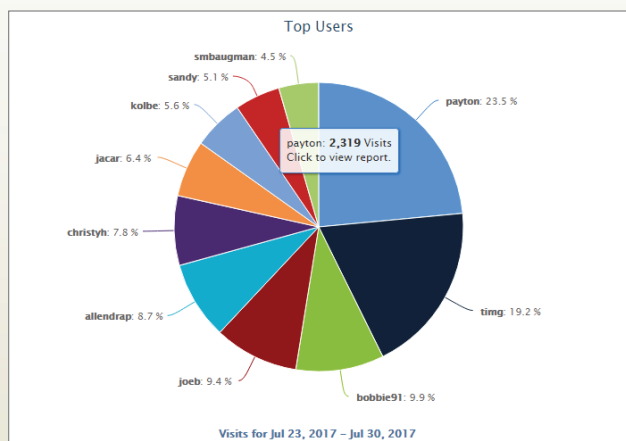

- Makes technical data easy to consume and manager-ready.
- Utilizes precise algorithms to present accurate and up-to-date Web-use data.
- Distinguishes between user clicks (visits) and unsolicited traffic (hits).
- Analyzes large volumes of data over long periods of time.
- Feeds pertinent data to the reporting dashboards.

## Detailed User Audits

- Show activity by entire organization, groups, users, and categories.
- Get accurate, actionable, manager-ready detailed reports.
- See the exact search terms entered by users and their search time.
- Determine how much time a user spends online.
- View Web content most frequently visited by a user.
- Dramatically reduce analysis time of your organization's Web use.
- Comply with government and industry regulations such as CIPA and HIPAA.

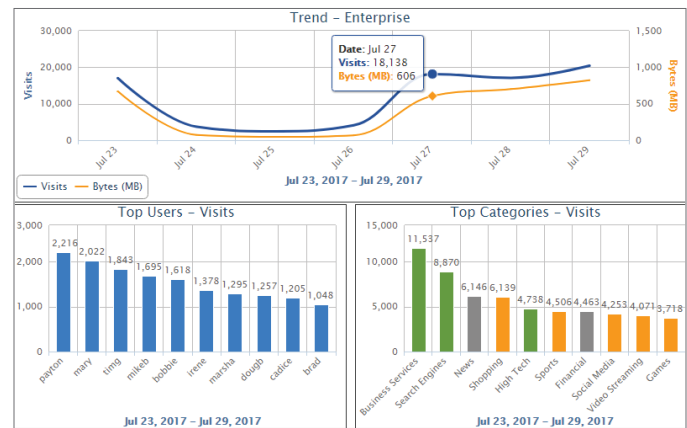

## Hits vs. Visits

- Most accurate visit algorithm in the industry.
- Visits give uncluttered, relevant Web activity detail based on user clicks.
- Visits are a critical component to understanding human behavior.
- Hits consist of unsolicited traffic and are not a reliable tracking metric on their own.

## Manager Access

- Schedule and distribute reports
  - Send easy-to-read reports directly to managers.
  - Easily distribute reports manually or schedule for automatic distribution.
  - Managers drill down to detailed user Web activity with interactive capability.
- Self-service portal
  - Reporting-only access portal for managers.
  - Managers create reports on authorized groups without assistance from IT.
  - Easy-to-read, manager-friendly, actionable reporting dashboard.

## Technical Advantages

- **Built-In Syslog Server.** Directly connect syslog-enabled devices.
- **Bandwidth Protection.** Monitor Web sites that consume the most bandwidth.
- **Security Assurance.** Identify spyware, malware, public proxies, etc.
- **Active Directory Support.** Seamlessly integrate with Active Directory.
- **Automatic List Updates.** Stay on top of the latest Web 2.0 trends.
- **Minimal-Effort Administration.** Administer through the browser with ease.
- **VM Installation.** Deploy in VMware and Hyper-V environments.
- **VM Array.** Handle large amounts of data depending on your environment and performance needs.
- **Adaptability.** Support log file formats regardless of proxy server or firewall.

## Flexible VM Deployment

Cyfin Virtual Appliance is ready to be downloaded and installed on your VM server. We support both VMware and Microsoft Hyper-V environments. Our VMware-compatible files can be imported into many VM systems in the industry.

Cyfin Virtual Appliance can also be deployed on Hyper-V which is built into Windows versions 8 and later, a common operating system that you are already familiar with. Hyper-V is also included in Windows Server. There is nothing to purchase when deploying on Hyper-V.

## Subscription Service

- No-charge, U.S.-based Wavecrest Technical Support by phone, live chat, WebEx, and e-mail for the lifetime of your license
- Continuous URL List updates
- Free product upgrades
- 30-day money-back guarantee

## Installation & Eval Support

When needed, Wavecrest provides consultation and advice via telephone, live chat, or e-mail at no charge during the free trial period as well as with a current license. Technical Support via WebEx (remote support) is also available.

## Log File Support

Cyfin Virtual Appliance supports Palo Alto, SonicWall, Check Point, WatchGuard, Cisco, Fortinet, and Sophos log file formats, and many more.
